***SAFETY CHALLENGES
IN THE***

Wind Power

INDUSTRY

The rapidly-growing Wind Power Industry presents a variety of safety challenges for those working at heights. Whether in turbine construction, maintenance or rescue/evacuation, providing safety at height solutions that enhance worker safety, comfort, trust and increase productivity has been our expertise for over 60 years.

Sperian® Fall Protection takes particular pride in bringing to market innovative solutions that increase user acceptance and lower overall cost. The Miller® brand offers engineered safety at height and rescue solutions, professional training services and the most extensive selection of fall protection equipment of any manufacturer worldwide.

With production facilities and sales offices on all major continents, the Miller brand continues to build strength as a global force by setting the standard in user-focused safety at height solutions.

Wind Turbine Construction, Maintenance and Rescue/Evacuation

FALL ARREST CONSIDERATIONS:

- Proper training and rescue plan development before a crisis occurs
- Reduce worker fatigue with lightweight and comfortable fall protection equipment
- Quick-operating descent devices along with self-rescue equipment
- Installation of vertical fall arrest ladder systems
- Proper fall protection when working from a ladder or service lift
- Variety of anchor points/connectors for safe access
- Vertical rope lifelines and rope grabs for special applications
- Fall protection equipment must be inspected, used, stored and maintained for proper performance – a life may depend on it

- Buenos Aires, Argentina ISO 9001:2000
- Franklin, PA – United States ISO 9001:2000
- Hof, Germany ISO 9001:2000
- Jundiaí, Brazil
- Partizánske, Slovakia ISO 9001:2000
- Shanghai, Republic of China
- Tijuana, Mexico ISO 9001:2000
- Victoria, Australia ISO 9001:2000
- Vierzon, France ISO 9001:2000

Proving international recognition of our overall design and manufacturing processes.

Engineered Safety at Height & Rescue Solutions

Dedicated to the design and installation of custom-engineered safety systems.

Miller Engineered Solutions offer custom designs and services that address unique structures and extreme conditions to ensure worker safety at height in any situation.

ENGINEERED SOLUTIONS INCLUDE:

- Innovative anchorage and ladder systems
- Compliance with regional and local codes and regulations

Our qualified, licensed and experienced personnel complete all work from design and engineering to final field commissioning, in compliance with federal and local codes and regulations. All engineered solutions are in accordance with our clients' work environment, procedures and budget. The added benefits expected include a significant reduction in risk, maintaining or lowering insurance premiums, controlling worker compensation claims, regulatory compliance and ultimately, safeguarding worker safety.

Professional Training Services

Providing the awareness training essential for maintaining a safe work environment in the Wind Power Industry.

Experienced instructors provide multilingual training, live demonstrations and hands-on training while addressing site-specific variables and performance requirements of fall prevention and protection. Sperian Protection hosts the largest Innovation Technology and Training Center in North America.

CUSTOM COURSES AVAILABLE:

- Occasional Climber*

SPERIAN

Protection you can trust

Striving to be the global reference leader in personal protective equipment (PPE), Spierian Protection designs, manufactures and markets high-quality, value-added products and services to those workers exposed to safety risks on the job site. Products are tailored to meet requirements for all types of jobs and work environments, combining advanced design technology and ergonomic factors.

Spierian was formed as a result of a merger between two leading safety companies (Bacou and Dalloz) and inspired by a strong entrepreneurial culture, became the world leading personal protection equipment provider. Our expertise lies in our knowledge of our users' business, the risks their workers face and ways to prevent injuries. This expertise is supported by our efficient and reactive supply chain to optimize distribution management.

Quality products and services are marketed under strong brands – the symbols of our reputation in the safety market.
