

Features & Benefits

August 6, 2012

Feature	Benefit
Color graphic display	Better readability and analysis in various lighting conditions
Dynamic info-graphing	Custom easy-to-read visual monitoring options
Optional Long-life (3 year) O ₂ sensor	Less replacement time and cost
B-Smart [®] CO Sensor Exchange Program	Simple, affordable solution to reliable, timely calibration – minimizes downtime.
CO sensor range from 0 - 4000 ppm	Less over range readings, more data
Integral NO _x filter on CO sensor	More reliable CO readings in high NO _x applications
O ₂ sensor life indication	No downtime from dead O ₂ sensor
Familiar menu and key functions	Easier to learn and use, intuitive operation
Ergonomic shape	Easy to transport and hold
Rubber boot with magnetic back	Simpler hands-free operation while testing
100 stored complete test records	More storage capacity for onboard service record-keeping and quick reference
Wireless IrDA printer option with customizable logo	Professional looking printouts of customized records and reports
PC interface through Fyrite [®] User Software and USB	Quick download and archiving of stored records and test data
