

SafEscape

Controlled Descent/Self-Rescue System

Safe, Timely Solution for Emergency Height Rescue

Miller® SafEscape™ Controlled Descent/Self-Rescue System offers a safe, timely solution for emergency height rescue. The SafEscape descender is specially designed for smooth, automatic vertical and angular controlled descent from overhead cranes, towers, aerial lifts, oil derricks, platforms or other elevated work areas.

Features:

- Automatic controlled descent design
- Approved for multiple descents during evacuation
- Easy to install and operate; minimum service and maintenance required
- Capacity: Two persons [330 lbs. each] descents up to 330 ft. (100m)
One person [330 lbs.] descents up to 1315 ft. (400m)
- Constructed of lightweight, high-strength cast aluminum
- Complies with OSHA 1926, Subpart M, Appendix C guidelines; meets all applicable standards throughout the world

How it works:

Simply install the SafEscape unit to a secure anchorage using a carabiner. Attach one end of the lifeline to the front rescue D-ring of the full body harness. Drop the excess lifeline to intended landing zone. The user's weight can then be transferred to the system and descend at a controlled rate (not exceeding 4.5 ft./sec.) to a lower level. As the user is descending, the opposite end of the rescue line is ascending and readying itself to perform yet another rescue.

The complete system, comprised of a SafEscape™ rescue unit, 3/8" polyester rope, rescue harness, cross-arm strap anchorage connector/carabiner, retrieval yoke and convenient carrying bag, provides the user or rescuer with all the necessary equipment required to perform self-evacuation or rescue.

Miller® SafEscape™ Self-Rescue System

Model No.	Product Description
AG10KT	Complete Miller SafEscape System includes SafEscape rescue unit, 3/8" polyester rope, rescue harness, cross-arm strap anchorage connector/carabiner, retrieval yoke and convenient carrying bag.
AG-10	Miller SafEscape automatic descender with rescue rope only. (Specify rope length.)
000109	Miller Rescue Harness
